VOLUME 15 • SUBJECT INDEX

abscess, Infratemporal and temporal fossa abscess complicating dental extraction, **59**
abstracts, Abstracts of the Scientific Meeting of the Faculty of Accident and Emergency Medicine, Royal College of Physicians and Surgeons, Glasgow, December 5-6, 1997, **129**
Annual Conference for the British Association for Accident and Emergency Medicine, Birmingham, 29 April to 1 May 1998, **277**
Conference on Emergency Medicine, Oxford, 27-30 September 1998, **384**
abuse, Misuse of the London ambulance service: how much and why?, **368**
academic emergency medicine, Future strategy for United Kingdom research in accident and emergency medicine, **46**
accident and emergency department, Choosing an accident and emergency department computer system: *management issues,* **123**
The cost of alternative models of care for primary care patients attending accident and emergency departments: a systematic review: *review,* **77**
acute myocardial infarction, Perceived contraindications to thrombolytic treatment in acute myocardial infarction. A survey at a teaching hospital, **329**
adrenaline, Accidental digital injection of adrenaline from an autoinjector device: *letter,* **287**
"Not so immediate" hypersensitivity—the danger of biphasic anaphylactic reactions, **252**
aerocoele, A rare case of hypoglossal nerve palsy complicating a head injury, **427**
agglutination, Waldenström macroglobulinaemia presenting as bleeding diathesis with paradoxical coagulation of blood samples: *emergency casebook,* **331**
airway management, Adult supraglottitis: an important cause of airway obstruction, **114**
alcohol, More alcohol: *letter,* **70**
Restricting extensions to permitted licensing hours does not influence the numbers of alcohol or assault related attendances at an inner city accident and emergency department, **23**
alcohol intoxication, Alcohol intoxication in a toddler: *letter,* **69**
Alcohol intoxication: *letter,* **366**
ambulance, Misuse of the London ambulance service: how much and why?, **368**
amnesia, Oral midazolam for conscious sedation of children during minor procedures, **244**
anaerobic bacteria, Aerobic and anaerobic microbiology of infections after trauma in children, **162**
anaesthetic, Anaesthetic for Colles' fracture: *letter,* **207**
analgesia, Analgesia in the accident and emergency department: do SHOs have the knowledge to provide optimal analgesia?, **147**
anaphylaxis, Guidelines for the management of anaphylaxis in the emergency department, **96**
"Not so immediate" hypersensitivity—the danger of biphasic anaphylactic reactions, **252**
Therapeutic controversies in the management of acute anaphylaxis: *review,* **89**
Tick bite anaphylaxis in Australia, **111**
ankle fracture, Use of the Ottawa ankle rules by nurse practitioners, **315**
ankle injuries, Intrasound for ankle injuries: *letter,* **70**
ankylosing spondylitis, Puffer fish poisoning, **334**
anterior glenohumeral dislocation, Anterior glenohumeral dislocation: *letter,* **365**
appropriateness, Appropriateness of use of emergency ambulances: *review,* **212**
artery, Closed digital artery injury: *emergency casebook,* **307**
aspiration, British Thoracic Society guidelines for the management of spontaneous pneumothorax: do we comply with them and do they work?, **317**
assaults, Restricting extensions to permitted licensing hours does not influence the numbers of alcohol or assault related attendances at an inner city accident and emergency department, **23**
asthma, Computed tomography of the head by the accident and emergency department—why 24 hour access is vital, **294**
asystole, The flat electrocardiogram—systole or asystole?, **185**
audit, Audit in the accident and emergency department: *management issues,* **358**
autoinjector device, Accidental digital injection of adrenaline from an autoinjector device: *letter,* **287**
avoidable deficiences, Avoidable deficiencies in the delivery of health care to children with meningococcal disease, **298**

barotrauma, Conservative management of gastric rupture following scuba diving, **116**
best evidence topic report, Moving towards evidence based emergency medicine: use of a structured critical appraisal journal club, **220**
The best evidence topic report: a modified CAT for summarising the available evidence in emergency medicine, **222**
Towards evidence based emergency medicine: best BETs from the Manchester Royal Infirmary, **227, 352, 380**
biphasic, "Not so immediate" hypersensitivity—the danger of biphasic anaphylactic reactions, **252**
bleeding, Waldenström macroglobulinaemia presenting as bleeding diathesis with paradoxical coagulation of blood samples: *emergency casebook,* **331**
blood culture, Clinical impact of blood cultures taken in the emergency department, **254**
blunt chest injury, Late clotted haemothorax after blunt chest trauma, **189**
body spray, Alcohol intoxication: *letter,* **366**
bodybuilding, Caffeine toxicity in a bodybuilder, **196**
bulimia, Life threatening airway obstruction: a hazard of concealed eating disorders, **332**

caffeine, Caffeine toxicity in a bodybuilder, **196**
calcaneum, The calcaneum as a site for intraosseous infusion, **421**
cardiac arrest, Out of hospital cardiac arrest and associated injury, **191**
The flat electrocardiogram—systole or asystole?, **185**
cardiac output, Non-invasive assessment of cardiac output in children, **304**
cardiopulmonary resuscitation, Relatives in the resuscitation room: their point of view, **109**
carotid artery dissection, Spontaneous carotid artery dissection presenting as migraine—a diagnosis not to be missed, **187**
cervical spine, Do supine oblique views provide better imaging of the cervicothoracic junction than swimmer's views?, **151**
changing behaviour, Continuing medical education one year on—how was it for me?, **360**
chest drain, Development of tension pneumothorax after chest drain insertion: *emergency casebook,* **128**
chest trauma, Delayed rupture of the mitral valve complicating blunt chest trauma, **422**
chest wall, Symmetrical necrotising chest wall infection following paronychia, **58**
child, Alcohol intoxication in a toddler: *letter,* **69**
Gastric evacuation for acute ethanol intoxication in a three year old, **54**
More alcohol: *letter,* **70**
children, Aerobic and anaerobic microbiology of infections after trauma in children, **162**
An alternative to "brutacaine": a comparison of low dose intramuscular ketamine with intranasal midazolam in children before suturing, **231**
Foreign body ingestion in children: an audit of transit time, **371**
Golf is a dangerous game: *letter,* **437**
Measurement of pain in children in the emergency department: *letter,* **140**
Non-invasive assessment of cardiac output in children, **304**
Oral midazolam for conscious sedation of children during minor procedures, **244**
chronic extradural haematoma, Infected chronic extradural haematoma, **432**
clarithromycin, Clarithromycin induced digoxin toxicity, **194**
clinical management, Clinical management—the series, **337**
The early management of meningococcal disease: *review,* **72**
clotted haemothorax, Late clotted haemothorax after blunt chest trauma, **189**
Colles' fracture, Anaesthetic for Colles' fracture: *letter,* **207**
complaints, Complaints—and how to deal with them: *management issues,* **63**
computed tomography, Computed tomography of the head by the accident and emergency department—why 24 hour access is vital, **294**
Investigation of the head injured patient, **337**
Silent orbitocranial penetration by a pencil, **274**
computers, Choosing an accident and emergency department computer system: *management issues,* **123**
conferences, Abstracts of the Scientific Meeting of the Faculty of Accident and Emergency Medicine, Royal College of Physicians and Surgeons, Glasgow, December 5-6, 1997, **129**
Annual Conference for the British Association for Accident and Emergency Medicine, Birmingham, 29 April to 1 May 1998, **277**
Conference on Emergency Medicine, Oxford, 27-30 September 1998, **384**
conscious sedation, Oral midazolam for conscious sedation of children during minor procedures, **244**
creatine kinase, Recent advances in accident and emergency medicine: *letter,* **437**
CS gas, CS gas exposure in a crowded night club: the consequences for an accident and emergency department, **56**
CS "gas" is not a gas: *letter,* **365**
CS spray, CS spray: *letter,* **288**
curriculum based teaching, Curriculum based teaching: *letter,* **208**

deep vein thrombosis, Outpatient management of deep vein thrombosis, **292**
delayed attendance, Later investigation of head injury, **344**
delayed intracranial haematoma, Later investigation of head injury, **344**
deliberate self harm, Deliberate self harm assessment by accident and emergency staff—an intervention study, **18**
dental extraction, Infratemporal and temporal fossa abscess complicating dental extraction, **59**
digital artery, Closed digital artery injury: *emergency casebook,* **307**
digoxin, Clarithromycin induced digoxin toxicity, **194**
disaster planning, Edinburgh's Hogmanay celebrations: beyond a major disaster, **272**
disciplinary procedures, Disciplinary procedures: *management issues,* **203**
documentation, Epilepsy in the accident and emergency department—developing a code of safe practice for adult patients, **237**
Doppler, Non-invasive assessment of cardiac output in children, **304**
drug interactions, Clarithromycin induced digoxin toxicity, **194**
drug monitoring, "Saturday night fever": ecstasy related problems in a London accident and emergency department, **322**
dysphagia, Life threatening airway obstruction: a hazard of concealed eating disorders, **332**

economic evaluation, The cost of alternative models of care for primary care patients attending accident and emergency departments: a systematic review: *review,* **77**
ecstasy, Ecstasy related trauma: *letter,* **436**
"Saturday night fever": ecstasy related problems in a London accident and emergency department, **322**
ectopic pregnancy, Ectopic pregnancy presenting with obturator nerve pain, **192**
Efficacy of transabdominal ultrasound examination in the diagnosis of early pregnancy complications in an emergency department, **155**
education, Continuing medical education one year on—how was it for me?, **360**
elbow dislocation, A case of ipsilateral shoulder and elbow dislocation: an easily missed injury: *emergency casebook,* **198**
electric ear syringe, Use of an electric ear syringe in the emergency department, **327**
emergency ambulances, Appropriateness of use of emergency ambulances: *review,* **212**
emergency anaesthesia, Pre-hospital emergency rapid sequence induction of anaesthesia: *letter,* **286**
emergency care, Accident and emergency 24 hour senior cover—a necessity or a luxury?, **181**
emergency care model, So many unanswered questions: the emergency care system of the future, **49**
emergency medicine, A transatlantic comparison of training in emergency medicine, **175**

positive pressure technique, Foreign body removal from children's noses: *letter,* **366**
postconcussional symptoms, Later investigation of head injury, **344**
pregnancy complications, Efficacy of transabdominal ultrasound examination in the diagnosis of early pregnancy complications in an emergency department, **155**
prehospital analgesia, Effects on patient care of introducing prehospital intravenous nalbuphine hydrochloride, **99**
pre-hospital care, Pre-hospital emergency rapid sequence induction of anaesthesia: *letter,* **286**
primary care, Cost of alternative models of care for primary care patients attending accident and emergency departments: *letter,* **435**
The cost of alternative models of care for primary care patients attending accident and emergency departments: a systematic review: *review,* **77**
primary care problems, Primary care problems in patients attending a semi-rural accident and emergency unit: a prospective study, **168**
Primary care problems in patients attending a semi-rural accident and emergency unit: *letter,* **435**
proforma, Epilepsy in the accident and emergency department—developing a code of safe practice for adult patients, **237**
protocols, Do we need to be propped up with protocols?: *letter,* **365**
"shop hopping" "Shop hopping": *letter,* **288**
psychological sequelae, Vulnerability, victims and violence, **39**
psychosocial assessment, Deliberate self harm assessment by accident and emergency staff—an intervention study, **18**
puffer fish, Puffer fish poisoning, **334**

quality, Can nurse practitioners offer a quality service? An evaluation of a year's work of a nurse led minor injury unit, **266**

radiology, Developments in radiology: *letter,* **209**
Do supine oblique views provide better imaging of the cervicothoracic junction than swimmer's views?, **151**
raised right hemidiaphragm, Unusual cause of a raised right hemidiaphragm, **433**
rapid sequence induction, Pre-hospital emergency rapid sequence induction of anaesthesia: *letter,* **286**
recreational drug, Nutmeg intoxication: *letter,* **287**
referred pain, Ectopic pregnancy presenting with obturator nerve pain, **192**
relatives, Relatives in the resuscitation room: their point of view, **109**
Should relatives be allowed in the resuscitation room?: *letter,* **364**
Should relatives be allowed in the resuscitation room?: *letter,* **364**
Renaissance, The treatment of head injury during the Renaissance, **119**
research, Future strategy for United Kingdom research in accident and emergency medicine, **46**
resuscitation, Out of hospital cardiac arrest and associated injury, **191**
Should relatives be allowed in the resuscitation room?: *letter,* **364**
Should relatives be allowed in the resuscitation room?: *letter,* **364**
resuscitation room, Relatives in the resuscitation room: their point of view, **109**

scalp laceration, Osteomyelitis of calvarium after trivial scalp laceration, **430**
scaphoid fracture, A late presentation!: *letter,* **437**

scuba diving, Conservative management of gastric rupture following scuba diving, **116**
seat belt, Fatal intra-abdominal injury associated with incorrect use of a seat belt: *letter,* **437**
security, Violence and verbal abuse against staff in accident and emergency departments: a survey of consultants in the UK and the Republic of Ireland, **262**
semi-rural A&E unit, Primary care problems in patients attending a semi-rural accident and emergency unit: a prospective study, **168**
Primary care problems in patients attending a semi-rural accident and emergency unit: *letter,* **435**
senior house officers, Analgesia in the accident and emergency department: do SHOs have the knowledge to provide optimal analgesia?, **147**
Can accident and emergency nurse practitioners interpret radiographs? A multicentre study, **105**
SHOs' interpretation of *x* rays: *letter,* **208**
sepsis, Clinical impact of blood cultures taken in the emergency department, **254**
serotonin syndrome, Serotonin syndrome due to venlafaxine overdose, **333**
sevoflurane, Sevoflurane: *letter,* **207**
short stay ward, Role of the short stay observation ward in accident and emergency departments in the United Kingdom, **26**
shoulder, Anterior glenohumeral dislocations: what to do and how to do it: *review,* **7**
shoulder dislocation, A case of ipsilateral shoulder and elbow dislocation: an easily missed injury: *emergency casebook,* **198**
sickle cell crisis, Management of sickle cell crisis: *commentary,* **356**
skull radiography, Investigation of the head injured patient, **337**
specialist training programme, How to organise a higher training programme in A&E: *management issues,* **121**
spinal boards, Use of the spinal board within the accident and emergency department, **108**
spinal cord compression, Puffer fish poisoning, **334**
spinal tumour, Spinal tumour: a diagnostic lesson: *emergency casebook,* **199**
sports injury, A profile of sports hand injuries in an accident and emergency department, **35**
staff, Violence and verbal abuse against staff in accident and emergency departments: a survey of consultants in the UK and the Republic of Ireland, **262**
steroids, Therapeutic controversies in the management of acute anaphylaxis: *review,* **89**
stone heart, The flat electrocardiogram—systole or asystole?, **185**
streptococcal myositis, A case of streptococcal myositis (misdiagnosed as hamstring injury), **425**
stroke distance, Non-invasive assessment of cardiac output in children, **304**
subarachnoid haemorrhage, Computed tomography of the head by the accident and emergency department—why 24 hour access is vital, **294**
substance abuse, Caffeine toxicity in a bodybuilder, **196**
substance misuse, "Saturday night fever": ecstasy related problems in a London accident and emergency department, **322**
subungual haematoma, Subungual haematomas: is simple trephining enough?, **269**
suicide, Recurrent overdose: patient characteristics, habits, and outcomes, **257**
supine oblique view, Do supine oblique views provide better imaging of the cervicothoracic junction than swimmer's views?, **151**
supracondylar fracture, Supracondylar fracture of the humerus with ipsilateral fracture of the scaphoid in a child, **431**
supraglottitis, Adult supraglottitis: an important cause of airway obstruction, **114**
suturing, An alternative to "brutacaine": a comparison of low dose intramuscular ketamine with intranasal midazolam in children before suturing, **231**
swimmer's view, Do supine oblique views provide better imaging of the cervicothoracic junction than swimmer's views?, **151**

telemedicine, Can *x* rays be accurately interpreted using a low cost telemedicine system?, **312**
telephone survey, A profile of sports hand injuries in an accident and emergency department, **35**
temporal fossa, Infratemporal and temporal fossa abscess complicating dental extraction, **59**
tension pneumothorax, Development of tension pneumothorax after chest drain insertion: *emergency casebook,* **128**
tests, Clinical impact of blood cultures taken in the 'emergency department, **254**
tetrodotoxin, Puffer fish poisoning, **334**
thoracotomy, Late clotted haemothorax after blunt chest trauma, **189**
thrombolytic treatment, Perceived contraindications to thrombolytic treatment in acute myocardial infarction. A survey at a teaching hospital, **329**
tick borne diseases, Tick bite anaphylaxis in Australia, **111**
tick infestations, Tick bite anaphylaxis in Australia, **111**
toddler, Motorbike toe: a toddler's sporting injury: *emergency casebook,* **22**
toxic syndrome, Nutmeg intoxication: *letter,* **287**
toxicity, Fatal flecainide intoxication, **423**
toxicology, Recurrent overdose: patient characteristics, habits, and outcomes, **257**
tracheal deviation, Computed tomography of the head by the accident and emergency department—why 24 hour access is vital, **294**
training, A transatlantic comparison of training in emergency medicine, **175**
Analgesia in the accident and emergency department: do SHOs have the knowledge to provide optimal analgesia?, **147**
Deliberate self harm assessment by accident and emergency staff—an intervention study, **18**
General practice: a secondment from emergency medicine—so what!, **218**
How to organise a higher training programme in A&E: *management issues,* **121**
Review of a general practice attachment for accident and emergency training: *review,* **215**
transient ischaemic attacks, Diagnosis and management of transient ischaemic attacks in accident and emergency, **374**
transit time, Foreign body ingestion in children: an audit of transit time, **371**
trauma, Aerobic and anaerobic microbiology of infections after trauma in children, **162**
traumatic brain injury, The management of minor traumatic brain injury: *review,* **84**
trephine, Subungual haematomas: is simple trephining enough?, **269**
twenty four hour cover, Accident and emergency 24 hour senior cover—a necessity or a luxury?, **181**

ultrasound, Efficacy of transabdominal ultrasound examination in the diagnosis of early pregnancy complications in an emergency department, **155**
Fibular fracture: detection with high resolution diagnostic ultrasound: *emergency casebook,* **118**
undergraduate education, *commentary,* 201
upper airway obstruction, Adult supraglottitis: an important cause of airway obstruction, **114**
Sevoflurane: *letter,* **207**
USA, A transatlantic comparison of training in emergency medicine, **175**
The work of the American emergency physician, **170**

vaginal temperature measurement, Intravesical thermometer: an unusual complication of vaginal temperature measurement, **432**
venlafaxine, Serotonin syndrome due to venlafaxine overdose, **333**
ventilation bag, The question of removing a ventilation bag before defibrillation: *letter,* **286**
verbal abuse, Violence and verbal abuse against staff in accident and emergency departments: a survey of consultants in the UK and the Republic of Ireland, **262**
victims of violence, Vulnerability, victims and violence, **39**
violence, Violence and verbal abuse against staff in accident and emergency departments: a survey of consultants in the UK and the Republic of Ireland, **262**
Vulnerability, victims and violence, **39**

Waldenström's macroglobulinaemia, Waldenström macroglobulinaemia presenting as bleeding diathesis with paradoxical coagulation of blood samples: *emergency casebook,* **331**
warfarin, The risks of minor head injury in the warfarinised patient, **159**

***x* ray films,** Can *x* rays be accurately interpreted using a low cost telemedicine system?, **312**
***x* ray interpretation,** Can accident and emergency nurse practitioners interpret radiographs? A multicentre study, **105**
***x* rays,** SHOs' interpretation of *x* rays: *letter,* **208**
